The key macro is a utility to record a set of keystrokes, save them as a file and load them later. The idea is very simple. Once you record a set of keystrokes, you save the file with the name of the computer from which you recorded them, the date and the time of the recording. The keystrokes you saved are automatically loaded into the memory of your computer, without the need to do anything else. You can then use the keystrokes you loaded, in order to quickly perform some actions. KEYMACRO comes with a set of standard keystrokes. The package also includes the ability to create your own. You can record and load a set of keystrokes very easily, with just one click. Create a keystroke by clicking the icon of a set of buttons. Record your own keystrokes, with the help of the provided editor. Load the recorded keystrokes in order to use them later. You can record up to 9 keystrokes at the same time. KEYMACRO Keystroke record: Record the keystrokes you want to use, one at a time, by clicking on the icon. KEYMACRO Keystroke Load: Load the keystrokes you recorded by clicking on the icon. KEYMACRO History: This section contains the recorded keystrokes you have previously loaded into the memory of your computer. KEYMACRO includes a color switcher in order to change the color of the characters. To do this, go to Options / Color / Main, and then select the color of the characters you want to use. KEYMACRO has a file size limit of 5 MB. KEYMACRO allows you to select the units you want to use. To do this, go to Options / Units / English, and then select the unit of measurement you want to use. KEYMACRO allows you to adjust the font size of the characters. To do this, go to Options / Font / Main, and then select the font size you want to use. KEYMACRO allows you to save the keystrokes you recorded as a zip file, which is easier to send via e-mail. To do this, go to Options / ZIP / Main, and then select the zip format you want to use.
